Legend

- 1) Prerequisite: If a point is a prerequisite in LEED 2.1, it is marked in the Prerequisite column.
- 2) UC Points indicates whether a point is a UC point
- 3) UC Mandatory indicates whether a point is mandatory in the UC Green Building Guide
- 4) UC Discretionary indicates whether a point is discretionary in the UC Green Building Guide
- 5) Baseline Points indicates whether a point is incorporated into a Campus Baseline.
- 6) Additional Points indicates whether a point is claimed as a project-specific point in addition to the points included in the Campus Baseline.
- 7) Three columns are given to aid tracking inclusion of points through the facility design process. These are 'Initial Goals', 'End Schematics' and 'Regents DR Final'.
- 8) Points proposed in the DRAFT LEEDTM for Campus Application are shown, but cells under the categories described above are grayed out. As soon as the US Green Building Council approves the LEEDTM for Campus Application Guide, these points (or similar) will be incorporated into the UC Green Building Guide.
- 9) The equivalent to 'LEEDTM Certified' equals 26 earned points and all applicable prerequisites. Equivalencies to other LEED rating levels are as may be determined by the US Green Building Council from time to time.
