

## Community Group Update – June 2019

The 2019 All-Campus Commencement Ceremony will be held on Saturday, June 15<sup>th</sup>, 2019, at 9:00 a.m., on RIMAC Field. For additional graduation information please visit: <https://commencement.ucsd.edu/>

### Projects

The location of instructional, research and campus support facilities, such as housing and parking, is directed by [UC San Diego's Long Range Development Plan](#), which is prepared in response to campus enrollment and population projections. Visit <http://plandesignbuild.ucsd.edu/> for additional information. An interactive campus map illustrating major campus projects with brief descriptions is also available at [maps.ucsd.edu](http://maps.ucsd.edu).

### UC San Diego Projects Open House

## UC SAN DIEGO CAPITAL PROJECTS OPEN HOUSE

UC San Diego Campus Planning invites you to come learn about its recently approved 2018 Long Range Development Plan, housing plans, and other projects underway, including the Future College Living and Learning Neighborhood.

Friendly open house format, stop by anytime and help spread the word with friends and colleagues.

# JUNE 19, 2019

Wednesday | 5:00 p.m. – 7:00 p.m.  
**5:45 p.m. Presentation**

### The Ida and Cecil Green Faculty Club at UC San Diego

Enter campus at La Jolla Shores Dr and go north on Scholars Dr. Follow signs to P206.

**DATE:** June 19, 2019

**TIME:** 5 p.m. to 7 p.m. with a presentation at 5:45 p.m.

**DIRECTIONS:** Visit <http://facultyclub.ucsd.edu/directions/index.html>

**PARKING:** Complimentary parking will be provided. Check in at the front desk for a permit. Carpooling is recommended.

**REFRESHMENTS:** Light refreshments will be provided.

### Ridge Walk: Restoration and Revitalization Project

This project, anticipated to begin later this month, includes restoration and revitalization of Ridge Walk. The project will improve the pedestrian and cyclist experience, making strong and identifiable connections along the north-south axis of campus, as well as to and from the University Center and transit hub. The design restores the legibility of the corridor by improving the paving, planting, and lighting. The design enhancements provide improved access, comfort, clarity, and safety for users, including shaded areas with comfortable seating, enhanced bike and pedestrian paths, and a variety of gathering spaces.

### Scripps Institution of Oceanography Pier Railing Replacement Project

This project, anticipated to begin later this month, replaces the wooden railing on the pier which is severely deteriorated in several areas. Despite its continuous maintenance over the last 30 years, the Douglas Fir railing has been subject to both dry rot and termite infestations. The replacement railing includes 316L electro-polished stainless steel, and Ipé cap rails and side rails, anticipated to withstand weather conditions for over 75 years with minimal maintenance in this highly corrosive environment.

The Scripps Institution of Oceanography Pier is one of the world's biggest research piers and is used to launch boats for nearshore research, involving a variety of experiments. It is used for research purposes, scientific diving, sampling, instrument testing, and teaching. Data on ocean conditions and plankton taken from the pier since 1916 provide an unparalleled source of information on changes in the coastal Pacific Ocean.
