

## COVID-19 PROTOCOLS – December 17, 2020

1. **Complete daily symptom screening.** All visitors should already be following this requirement on active project sites per previous county health orders and state guidance. Please remind your staff of this daily practice.
2. **Enable CA Notify technology on mobile devices.** This is a new requirement. Contractors and consultants should immediately comply with this UC San Diego mandate by requiring all workers on their job sites at every contractual tier to add and enable the technology on their smartphones. We recognize that implementation will depend upon individuals having mobile device technology and that some individuals may not comply due to privacy or potential union concerns.
3. **Adhere to all campus COVID-19 health and hygiene measures.** All visitors should already be following this requirement on active project sites per previous county health orders and state guidance. Please remind your staff of this daily practice.
4. **Recommendation to receive COVID-19 testing at the same frequency as the campus.** Currently, we are providing no guidance on this recommendation. Contractors and consultants are to be fully versed in, and ensure full compliance with, existing testing protocols necessary to comply with county health orders, state guidance and the new Cal/OSHA order 3205.1.
